

Job interview

- Welcome to APPTRIX, Galina. I am Sofia.
- Hello, it's nice to meet you.
- Nice to meet you too, how are you doing today?
- I am doing well, and yourself?
- Great, thanks. I hope we didn't keep you waiting for long?
- No, I had the chance to talk to one of your engineers while waiting.
- That's good. Galina, shall we start?
- Yeah, sure.
- First of all, let me introduce myself. I am the manager of our engineering department here and we have an open position, so we have been interviewing applicants to fill the position as quickly as possible.
- Yes, I read about the position on HeadHunter website, and I think I'm a good fit.
- We currently have several ongoing projects and the team is working hard. We are hoping to keep busy for a long time.
- What are the essential qualifications required for the position?
- This is an junior-engineering position, we do provide a lot of training here. But we do require that you have at least a bachelors degree in computer engineering. Previous experience in the field is a plus.
- What kind of experience would you count as a work in the field?
- Even though we provide training, it would be great if you had some hands-on programming experience, knowledge of database systems or skills on developing applications.
- My final educational project was actually developing a web application with mobile version, so I'm fairly competent in developing mobile and web applications.
- That's good to hear, which university did you graduate from?
- I was a student at Herzen University, and I graduated with a bachelor degree in computer science. I worked as a programming teacher in private school for about 2 years. Guiding students through their projects helped me get experience in several programming languages.
- What are you looking for in a job?
- The job should definitely help me grow in my career. I will be happy to learn and grow as I work in a passionate company like yours.
- You are right. There is plenty of room for advancement in our company. What are your strengths? Why should I hire you?

- I'm a diligent person and a fast learner. I am very eager to learn. My friends also find me very easy to work with.
- Very well. Now, do you mind working overtime?
- No, I do not.
- Because, sometimes we get overwhelmed with heavy workload.
- I understand that's the nature of the job. When I was going to school, I took quite a few courses each semester while working at least twenty hours every week. And, I handled that situation very well.
- Do you have any questions for me?
- No, I think I have a pretty good understanding of the requirements. I believe that I can handle it with ease, and the fact that you provide all the training sounds excellent. I hope to have the opportunity to work for you.
- Galina, it's nice to meet you. I can tell that you are a good candidate. Expect to hear from us within a week or so about the job.
- Nice meeting you too. Thank you for your time.
- Thank you for coming.
