[Application Date]

EPAM Training Center

When I discovered the programming internship with Epam on training.ru, I was excited by the opportunity to complement my diploma with practical experience. As a junior majoring in Computer Science at Herzen University, I am passionate about programming web and mobile applications. My relevant academics and teacher work have prepared me well for this position.

- **Relevant academics.** I have completed the following courses: Programming on Python, Data Science on Python, Web technology, and Database.
- **Teacher work.** For almost two years I taught in programming school with an emphasis on the Olympics. I prepared kids for different competitions so I had learned many technologies for developing web or mobile applications.

I am excited by the chance to contribute to your organization and am prepared to engage in continuous learning. I worked with different frameworks, and I will glad to learn some more about them and anything else that you can give me.

My enclosed resume expands on my relevant academics and work experience. As I prepare for a career in web developing, I am eager to gain a more detailed understanding of the field and would be excited to join your team. Thank you for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Galina Elkina
