present
1 year 8 months

Moscow School of Programmers

St. Petersburg, informatics.ru/

Educational institutions

- School

Programming teacher, methodologist, head of methodologist's support. department

As a teacher, I teach programming to children at different levels.

As a methodologist, I am developing a programming course for children in grade 5 (11-12 y.o.) based on the Python language. The course also comes with various additional materials developed by me based on web technologies such as HTML, CSS, JS.

As an accompaniment leader, I communicate with a certain circle of methodologists who have special, let's say, responsibilities. And as the leader of this group, I identify the problems of employees, identify them in a personal conversation, solve some of them on my own or help an employee solve them, collect statistics, compile free-form reports on the work of employees of this group, and also assign various tasks to support school courses, I organize their implementation, if required, and I also carry out some instructions for organizing the work of employees from higher-ranking managers.

Education

Incomplete higher education

2022

Herzen University, St. Petersburg

Institute of Information Technology and Technological Education, Informatics and Computing.

Application letter

Hello!

<https://github.com/iamgo100> is a link to my Git profile with tutorial and not-so-repositories.

I would like to note that during study time I personally developed a project in Python using SQL queries, and I am quite familiar with and also worked with XML for educational purposes.

Ready to learn anything needed for the job.

I'd love to see you at the interview!
